PROJECTS / OPEN-SOURCE

portfolio-website | Link   *javascript, reactjs, api*
Built my portfolio website using reactjs a javascript library and designed it with modern css.

Chatgpt clone | Link   *reactjs, api, javascript*
Created clone of Chatgpt using api of openapi used vanilla javascript to implement it on frontend . Used node and express in backend. In this website you can ask questions to AI and it will answer mostly accurate.

Food-Delivery web-app | Link   *mongodb, expressjs, nodejs, reactjs*
Made this Web-app using mern stack i have also used redux for state management.This web-app has user login and registration feature. In this web app you can add food to cart and then order food and if you are an admin you can create food

Amazon-scraping chrome extension | Link   *javascript, chrome extension*
In this extension you can scrape data from amazon when you search some category and also download the data in form of csv file.

HONORS & AWARDS

Solved 100+ problems on leetcode

Solved 200+ problems on codeforces

Solved 150+ problems on codechef and max rank of 4 star
